Our Services

Here at Abbess, our services in medical grade treatments go beyond industry standards with insight from a board certified physician and medical esthetician on sight.

Our location in the metro Atlanta area allows for convenient visits without having to travel through downtown Atlanta traffic.

Facials, Botox and Fillers

Microdermabrasion, superficial chemical peels, and facials are quick, economical, no-downtime procedures that renew your skin.

They remove dead skin cells and stimulate the growth of new cells. Injections provide a great way to achieve a more rested and youthful look without surgery. BOTOX smooths out facial lines and fillers like Juvederm, Radiesse and Voluma fill in shadowy area and restore volume. Both types of injectable are administered during an office visit in a gentle manner that is well tolerated.

Skin Tightening

Fast, Pain Free Face & Body Contouring MABEL PLUS is a third generation radio frequency machine that tightens and lifts skin while draining and shrinking fat cells. The treatment is pain free, involves no down time and results are visible after one session.

Other Services

Brow and Lash Tinting
Waxing - Lip, Chin, Brow,
Bikini and Brazilian

Medical Weight Loss Program

Weight Loss & Anti-Aging Concierge offers weight loss Physician supervised support through counseling, prescription medications, supplements, and even bio identical hormone replacement therapy.
